RE: INVENTIS CELLO AND TRAINING

To whom it may concern

The addition of the Cello Audiometer by Inventis to our Speech Therapy Department at Osindisweni Hospital is much-appreciated from the DOH. This new piece of equipment will allow us to perform screening evaluations which we were previously unable to perform due to equipment limitations and ensure that patients receive the best management. The portability of the device is an additional benefit not only for patients at the hospital but for those at the various clinics we service that are unable to come to the hospital due to financial constraints and travelling limitations.

The training received from the Audiologist and Customer Support Manager was highly informative. I appreciated the online training as well as the visit to the hospital to provide hands-on orientation and training. Relevant information was provided regarding working in clinical settings in addition to advice for troubleshooting possible challenges. Many thanks to AMHT team for the training. The Speech Therapy department at Osindisweni Hospital appreciate all the after-hours and on-the-road support from AMHT. Looking forward to working with AMHT in the future.

Kind regards,

T.LAKHI

Taskeen Lakhi
