Rietvlei District Hospital

RE: Cello diagnostic audiometer – Training & Installation

Date: 19/04/2021

To whom it my concern

The presentation done by the Technical audiologist and Customer Support Manager from AMHT was thorough and quite informative.

The team was professional, and clarified everything to ensure that the audiologist is competent in the use of the equipment. The Cello is an incredible addition to our department. It is aesthetically pleasing, user-friendly and its portable nature will make it possible for us to assess in-patients and patients at clinics who are unable to get to the hospital due to financial restraints.

Kind Regards

Nombongo Ntswayi
