20 April 2021

Dear AMHT,

I trust this letter finds you well.

I am writing this letter to thank you for your help last week. For a long time, we have struggled with assessing our patients. Previously, the device we used wasn't as efficient as the Audiometer donated by Department of Health on behalf of AMHT to Mfundo Arnold Lushaba CHC last week.

I would also like to thank AMHT for the training that was provided by the staff, it really made things easier for us. The device is user friendly; we can also take it with us to remote clinics and it works just as well there. We also noted that on the Cello Audiometer Software we can add notes to the results and print directly from the device through a computer. It also saves the patients data on the software as sometimes patients lose their files and we have to re-do assessments. There won't be a need for this anymore.

I do believe this gives us an edge and enables us to assist more patients than we did before. I would recommend that all hospitals look into getting this device for reasons I have outlined above.

Please note so far, I have not had any issues with the Audiometer but it was stated that we can contact AMHT at any time should we have any further questions or possible issues.

Thank you once again.

Kind Regards,

Nomfundo Dlamini (Chief Audiologist)

***Mfundo Arnold Lushaba CHC (previously known as Turton CHC)***
