RE: The training and supply of equipment at Manguzi Hospital by AMHT

On behalf of Manguzi Audiology team and management, thank you for the Cello Audiometer

The training at Manguzi went well and it was very informative and professional.

The Cello is really an all-in-one solution audiology assert. It is easy to carry from one setting to another. It makes an Audiologist work easy by providing all required feature on screen and in one go, from recording results to writing a report and automated patient archives. This piece of equipment could be a breakthrough for a busy-setting and where there is a shortage of resources and / or funding.

We will definitely enjoy our Cello Audiometer at Manguzi

N.L Zulu
