RE: Supply and Training of Inventis Cello Audiometer

The Audiology department from Hlabisa would like to show appreciation for being selected to receive such a user friendly portable medical device.

This was made possible by the trainers Ms Luthuli L. and Mr.C Cochrane who were friendly and professional during the orientation of the device. They provided enough information and even gave the option to be bothered on their personal time past the service training to answer any queries we might have pertaining to the device or any equipment queries we might have.

The device is very user friendly and would recommend it for purchasing for anyone and we hope that it will be made accessible to all audiologist especially those in rural settings as hospitals may be too far for patients. Since the device is portable it allows for primary healthcare to be made possible as it can be carried to clinics and patients are seen there without having to spend a lot of money to get access to hospital. It would be appreciated if it is made accessible to CHC's as well where there are audiologists.

We look forward to using the audiometer.

S. Mdlalose
Audiologist
