Inventis Cello Audiometer Handover

I was in contact with Mr Cochrane from AMHT Customer Support in terms of hand-over and receiving of the Cello Audiometer in the Re-hab department.

He was speaking to Dr Olowe, our medical manager who asked me to receive the equipment at a scheduled time as Mbongolwane Hospital does not have an Audiologist or Speech Therapists at the moment.

The Audiologist Londeka went through each item with me for me to sign and handed over extra material that could be used in the Audiology department.

The fundamental training was done and have noted to us that they will be available for online Zoom training once an Audiologist or Speech Therapist arrives which Dr Olowe appreciated.

The team stayed afterwards to meet with Dr Olowe and show him the equipment and make sure he was happy.

We thank the AMHT team for their service and future after-sales service and know that this equipment will be used for good purposes once an Audiology position is filled.
