**RE: INVENTIS CELLO AND TRAINING**

To whom it may concern

The addition of the Cello Audiometer by Inventis to our Audiology Department at Appelsbosch Hospital is a much-appreciated gesture by the DOH.

This new piece of equipment will allow us to perform tests which we were not able to perform due to equipment limitations like speech testing and also ensure that the patient receives the best management based on a better understanding of the patient's difficulties.

The portability of the machine is an added and beneficial advantage not only for patients in the wards who need audiological assessments but for those at the different clinics we serve who are not able to come to the hospital due to financial reasons and the long distance they may need to travel.

The training I received from the Audiologist and Customer Support Manager was very informative and we appreciate them coming physically to visit us and for doing hands-on training. They provided me with relevant information for a clinical setting and with tips which also included troubleshooting should I come across different challenges.

Many thanks to AMHT for the training and the Audiology and Rehab department at Appelsbosch appreciate all the after-hours and on-the-road support from AMHT. Looking forward to seeing AMHT again and would love to see more of your equipment in the future.

Kind regards,

**Panaso Simelane**  
**(CSO Audiologist, Appelsbosch Hospital)**
