AMHT, THE SOLE SUPPLIER OF EAR-TECHNIC BRAND OF HEARING AIDS IN SOUTH AFRICA

ABOUT EAR-TECHNIC

Ear-technic, a European manufacturer of hearing aids since 2001, strive to provide the best product with the best service to the hearing problems with its business partners in more than 50 countries.

Their goals are:

1. To reduce the impact of the rapidly growing hearing related problems. For example, as research has shown an association between Covid19 and hearing loss. Ear-technic aims to provide the best solutions for those who suffer permanent hearing loss post Covid19.
2. To improve the quality of life of those diagnosed with permanent and debilitating problems such as hearing loss and Tinnitus.

EARNET HEARING AIDS

ABOUT EARNET

This is the brand name of their hearing aids. The Earnet hearing aids come in various types, styles and colours to cater for different hearing losses, personalities and preferences. The range of hearing aids covers from paediatric to the geriatric population.

Their hearing aids are Nano coated, making them resistant to water, humidity, dust, scratches from falling, which is an excellent feature, which helps to extend the hearing aid life span while reducing the need for frequent hearing aid maintenance.

Additionally, the Earnet hearing aids are CE and radiation certified. Furthermore they are compatible with the Noah and the Hi-Pro. These hearing aids are programmed using two different software, the Eartuning and Eartuning2 software. Hearing aids programmable with the Eartuning software include: the Aria6 series and the Royal family hearing aids. The Nano3 and T.I.E. series are programmed using the Eartuning 2 software.

THE TIE MODULAR

Eartechnic is the only company in the world that has created and patented the Transducer In The Ear [T.I.E.]

[VIEW MORE INFO ON THE T.I.E >> ▶](#)

The TIE modular is not only a new concept, but also a new category name in the industry!

It has a different hardware than all other devices, offers a new hearing style and maximum hearing pleasure.
